

# THE ROBOPRINT

EDITORS: Kaylani Dacanay, Sara Wolf

## UPCOMING EVENTS...

### **Cancellation of FIRST Championships**

The RoboVikes qualified to go to World Championships this year, but unfortunately, due to the COVID-19 pandemic, this event has been cancelled. We are thankful for the opportunity to compete and we know that together we will RISE.

## UPCOMING EVENT DATES

**EVENT NAME:** School Closure

**LOCATION:** Vanden High School

**DATE(S):** March 16 – June 5, 2020

---

---

## Important March / April Events

### Utah Regional

The Utah Regional was our team's first (and only) regional this year. Our robot performed very well and we ended up on the 4th seed alliance with teams 4293 and 4068. With our alliance, we made it to the Semi-Finals, for the first time since 2017!

The RoboVikes also won two judged awards! We won the Safety Award and after lots of talks with the judges both in the pit and in the stands, we won the Engineering Inspiration Award, sponsored by NASA for our work in STEM-based outreach! This award qualified us to go to the World Championships in Houston, Texas, the first time EVER that we have qualified at an "away" event on an outreach-based award!

### Sacramento Regional

Unfortunately, the Sacramento Regional was postponed indefinitely. However, while our team didn't have the opportunity to compete with our robot, we were able to compete for Chairman's and send two representatives to compete for Dean's List Finalist via Zoom.
